

ASSEMBLY MANUAL

NINA BAR WITH DOORS

IMPORTANT INFORMATION BEFORE STARTING ASSEMBLY:

The assembly must be carried out by at least 2 people.

The doors are made of tempered glass for added safety in case of breakage.

Do not place glass panes on unprotected hard surfaces, such as ceramic floors, iron, etc., as they may crack.

Silicone bumpers are used to protect and level the modules, and more than one shim can be used at a time.

Small gaps between the metal and the glass are normal, as they allow for the assembly of the piece!

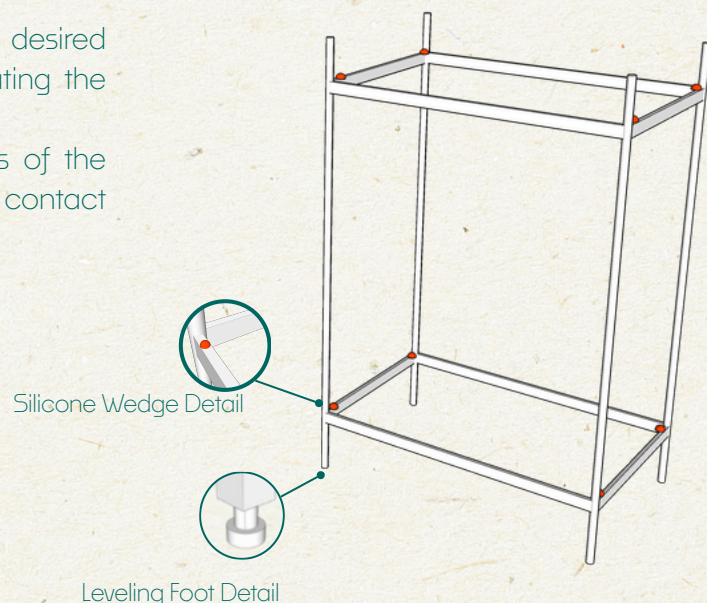

ASSEMBLY KIT

- Assembly Manual QR Code; Handling and Cleaning Manual;
- Silicone wedges;
- Hinges;
- Leveling foot.

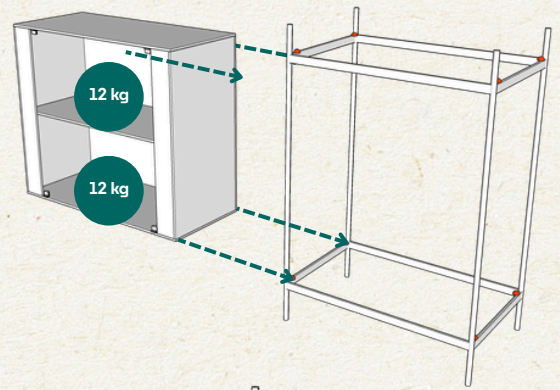

STEP BY STEP

1. Position the metal frame in the desired location. Level it if necessary by rotating the leveling feet.

Place the silicone pads on the sides of the frame, protecting the glass from direct contact with the frame, as shown in the figure.

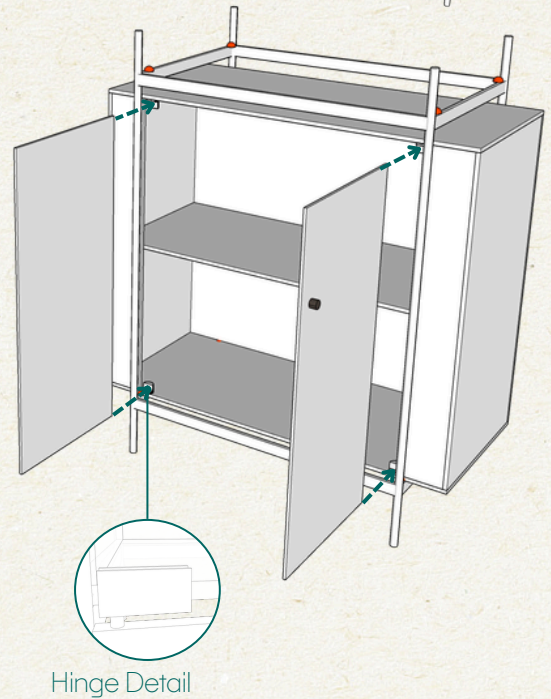

2. Fit the module into the central niche, along the side of the metal frame, ensuring it is centered. As shown in the adjacent figure.

3. Door Installation

Note: The part comes with hinges already attached to the glass.

Attach the hinged doors by first inserting the pin into the top hole and then aligning it with the lower hinge that is already fixed to the frame. Tighten the screws to ensure the glass does not slip off the hinge.

4. Fit the tray module onto the top of the frame, centering it.
